

# CSCI 200 - Fall 2023

## Foundational Programming Concepts & Design

### A0 - Assignment 0

[Home](#)[HW Sets](#)[Schedule](#)[Files](#)[Help ▼](#)[Links ▼](#)

→ **This assignment is due by Tuesday, August 22, 2023, 11:59 PM.** ←

→ **As with all assignments, this must be an individual effort and cannot be pair programmed. Any debugging assistance must follow the course collaboration policy and be cited in the comment header block for the assignment.** ←

→ **Do not forget to complete the following labs with this set: L0** ←

---

#### Part I - Get the Book

---

As mentioned in class, follow these steps to gain access to our e-book:

- Go to <http://zybooks.com>
- Create an account (you must use your mines.edu email address)
- Enter zyBook code: **MINESCSCI200Fall2023**
- Enter your section/time
- Pay with credit card (Cost \$64)

Once you have access, get started on Chapter 1 for the next class. The sections to be completed before class will always be listed on the **schedule page**.

Please Note: zyBooks must be purchased prior to Nov 30, 2023.

---

#### Part II - Tell Us About Yourself

---

You should already have an account for the course on **Ed Discussion**. If you do not, contact your instructor right away to get added. Once you do have access, please tell us a little about yourself by adding an introductory post. At a minimum, include the information below as well as anything else you feel is interesting for us all to know. You may find out someone has the same interests as you!

- Name
- Year

- Why you signed up for the course
- An interesting fact or two about yourself

To receive full credit, you must create your post with the following specifications:

- **Create this as a POST not a question.**
- **The title of the post must have your NAME.**
- **Post to the Assignments/A0 category.**

Ed Discussion will be the main point of communication for the course so become familiar with the interface. Be sure to read the pinned post before you begin posting. Please follow the posting guidelines. Posts that do not adhere to the posting guidelines will be removed with a request to properly repost the question.

---

### Part III - Submit Two Selfies

---

In order to help us learn all of your names as quickly as possible, submit two PowerPoint slides to Canvas each with an image of yourself. The first slide should just be an image of your face. On the second slide, please create a sign that has your name displayed and hold it up in view next to your face. Be creative! Extra kudos for photos from the rock wall or pool.

---

### Part IV - Take the Prereq Survey

---

The prerequisite for this course is CSCI 101. In Canvas, go to Assignments and choose Prereq Survey. This quiz is graded only for completion and serves as a self-test of concepts we will be using during the semester. If there is an area you are unsure of, then make a note to yourself to review that material.
